OBJECTIVE

Driven MCA graduate specializing in Cloud Computing and DevOps, with experience in full-stack development, cloud deployment, and scalable system design. Skilled in building modern web applications using React.js, Node.js, MongoDB, PostgreSQL and AWS, with expertise in performance optimization, automation and secure software engineering.

EDUCATION

Master of Computer Application, Chandigarh University 2024 - 2026
Specialized in Cloud Computing and DevOps

Bachelor of Computer Application, CTIMIT ,Jalandhar 2021 - 2024

TECHNICAL SKILLS

General	C++, Data Structures and Algorithms (DSA), OOP, Cloud
Frontend	HTML, CSS, JavaScript, React.js, Next.js, Tailwind CSS, shadcn/ui
Backend and DataBase	Node.js, Express.js, MongoDB, SQL,PostgreSQL, Database Management Systems
Cloud and DevOps	Microsoft Azure, AWS, Docker, Kubernetes, Jenkins
Tools	Postman, Git, GitHub

EXPERIENCE

Web Developer Intern Feb 2026 - Present
Agrix Agrotech Private Limited *Patna, Bihar*

- Developed and optimized responsive web applications and dashboard features using React.js, Node.js and databases, improving user experience and supporting scalable digital platform operations.
- Worked on API integration, backend functionality and cloud-based deployment workflows while gaining hands-on experience in real-world product development and performance optimization.
- Collaborated on modern web solutions involving data management, automation and secure application development, strengthening skills in full-stack development, debugging and system scalability.

Web Development Trainee Jul 2023 - Aug 2023
O7 Services *Jalandhar, Punjab*

- Built a full-stack task management app (React, Node.js/Express, MongoDB) as the capstone project, implementing full CRUD operations and a basic JWT-based authentication system to secure user-specific task views.
- Added a real-time chat feature to a team dashboard using Socket.io, enabling simple message broadcasting and learning the fundamentals of WebSocket communication under mentor guidance.

Freelance Full Stack Developer — Remote Dec 2023 - Jan 2026

- Developed and deployed a scalable LMS platform, StudentNagri, using React.js, Node.js and PostgreSQL, implementing full-stack features focused on performance, user management and responsive design.
- Built and maintained live e-commerce websites for medicine and jewelry businesses using WordPress, handling website customization, SEO optimization and ongoing performance improvements.
- Managed end-to-end freelance web development projects independently, demonstrating strong problem-solving, client communication and the ability to deliver reliable production-ready solutions.

PROJECTS

Student Nagri (LMS)

- A comprehensive Learning Management System (LMS) with strict Role-Based Access Control (RBAC), featuring course marketplaces, video streaming and live class integration for students and educators.
- Architected a scalable full-stack ecosystem with a master administrative dashboard for revenue analytics and user lifecycle management, deployed via Nginx on AWS to ensure enterprise-grade reliability.
- **Tech Stack:** React.js, Node.js, Express.js, PostgreSQL, AWS, Nginx, and Tailwind CSS.

EventSync

- A comprehensive AI-powered Event Management System featuring secure Role-Based Access Control (Student, Faculty, HOD), automated PDF credentialing, and biometric attendance tracking.
- Engineered a secure Node.js REST API to manage event lifecycles and integrated client-side Machine Learning (face-api.js) directly into the React frontend to process webcam feeds for real-time facial recognition.
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, Tailwind CSS, face-api.js, PDFKit and React Query.

ResumeStrike

- A serverless, AI-powered ATS Resume Optimizer that dynamically tailors resumes and generates cover letters based on target job descriptions, featuring real-time keyword highlighting, live document editing, and automated ATS match scoring.
- Developed a serverless React app powered by the Gemini 2.5 Flash API for direct PDF processing, featuring a custom Regex highlighter, live WYSIWYG editing, and localStorage auto-saving.
- **Tech Stack:** React.js, Tailwind CSS, Google Generative AI SDK (Gemini 2.5 Flash)

CERTIFICATION

Node.js	Infosys — Springboard	Apr 2026
Red Hat Enterprise Linux Automation with Ansible	Red Hat	Mar 2026
Cloud-Based Testing Platforms Getting Started	Coursera	Feb 2026
Mastering Data Structures Algorithms	Udemy	Jan 2026
Web Development Mastery: HTML, CSS, JS More	Chandigarh University	Nov 2025
AWS Academy Graduate - Cloud Foundations - Training Badge	AWS Academy	Aug 2025
Cloud Virtualization, Containers and API	Duke University	Sep 2025
ReactJs	Infosys — Springboard	Feb 2025
Postman API Fundamentals Student Expert	Postman	Feb 2025

ACHIEVEMENTS

- Developed and deployed multiple live full-stack web applications for freelance clients and academic projects.
- Built scalable MERN stack projects with authentication, cloud deployment and responsive UI design.
- Gained practical experience in React.js, Node.js, PostgreSQL, MongoDB, AWS and API integration through real-world development work.

INTERPERSONAL SKILLS

Communication, Problem-solving, Time management, Teamwork

LANGUAGE

Hindi, English

INTEREST / HOBBIES

- Continuously experimenting with emerging full-stack frameworks and cloud-native architectures to engineer scalable web applications and automate DevOps workflows.
- Monitoring global geopolitical shifts and international relations to analyze their broader impact on the global economy and the evolving digital landscape.
